WILLOW RANGE

Solar Architectural Pathway Light

The WILLOW range offers innovative solar outdoor lighting solutions that balance high-performance technology with architectural elegance. Central to this range is our vertical solar light technology, which integrates high-efficiency modules directly into the pole structure. This engineering choice significantly reduces wind load, prevents debris accumulation, and ensures a sleek, 360-degree aesthetic suitable for any modern environment.

The series covers diverse applications: the compact Solar Lawn Light, the refined Solar Garden Light, and high-output solar street light systems for professional solar roadway lighting. Every unit features high-capacity battery storage and precision-engineered optics for optimal light distribution and extended autonomy during low-sunlight periods.

Light Inspired by Architecture

Solar lighting should not be an isolated object in the landscape.

It should become part of the environment, complement architecture, support ecological balance, and create meaningful spaces for people.

The WILLOW RANGE was created from this belief.

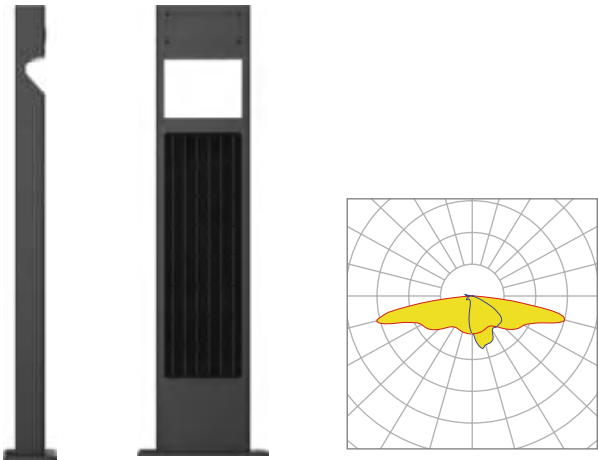

Solar Architectural Pathway Light

WILLOW RANGE

WILLOW RANGE — The elegance of simplicity. With its slender vertical silhouette and pure geometric form, WILLOW RANGE transforms sunlight into a gentle glow for modern landscapes. Perfect for pathways and garden borders, it defines minimalism in light.

WILLOW RANGE

Model	WRANGE-1 90CM	WRANGE-1 110CM
LED	6W 1,200lm	8W 1,600lm
A.o.o	300~600lm	-
Solar Panel	36Wp	40Wp
Battery	3.2V 24AH	3.2V 30AH
Color	Wood / Black / Customized	-
Height	90cm	110cm
Warranty	5 Years	5 Years

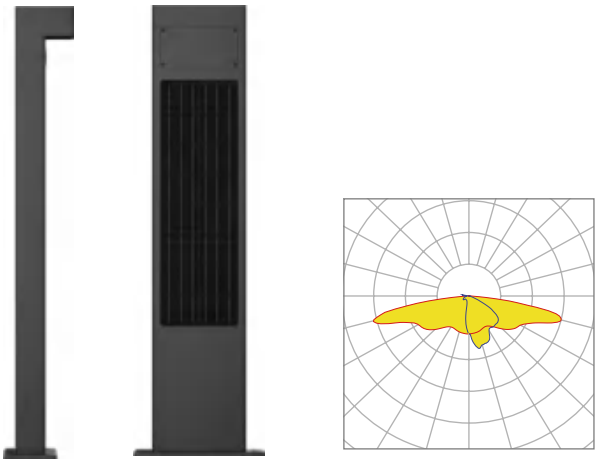

A.o.o stands for adaptive operating output.
